

(N/1013/7/0003) (MQA/PA16358)

The Master of Science in Gastronomy is a research-based programme that requires students to successfully complete and produce a thesis. The programme emphasises research-based learning, encouraging students to delve into specific areas of interest and contribute to the existing body of knowledge through their thesis work.

It is designed to cultivate critical thinking, analytical skills, problem-solving abilities and effective communication, equipping graduates to tackle complex issues related to food and gastronomy. The programme also allows students to explore food and gastronomy from various perspectives, including the arts, humanities, natural sciences and social sciences.
